

ProCraft Chains

Dock Fender Chain

3/4" Diameter

Hot Dipped Galvanized

Minimum Breaking Strength 110,000 Pounds

Proof Load Tested to 55,000 Pounds

Inside Dimensions 3.75 (L) x 1.125 (W)

ProCraft Part Number 08DF-GV24

This chain is a versatile long link chain with a very high breaking strength. The chain is commonly used to secure fenders to docks but is popular also in many mooring and marine uses. The large internal dimensions of the links allow for the easy fitting of shackles and end fittings without the need of special end links.
